LESSONS LEARNED FROM THE SEPSIS READMISSIONS FISHBOWL

BEFORE YOU DISCHARGE A SEPSIS PATIENT MAKE SURE YOU HAVE:

- Normalized the lactate
- Assessed and planned for delirium care and support
- Resolved, or see a trend towards normalization of organ dysfunction
- Narrowed the spectrum of any antibiotics, and educate on necessity of completing the course
- Educated on the signs and symptoms of infection if discharged with a line, drain, wound, catheter, etc.
- Evaluated and planned for any changes in functional status
