The first podcast features Tammy Fugate who is the Orthopedic Navigator at St. Joseph East in Lexington, KY. Tammy shares guidance on how to customize patient education and how to best identify and minimize modifiable patient risk factors. Patient and family engagement are key components and have resulted in more positive clinical outcomes. **CLICK TO LISTEN**

The second podcast features Karen Shannon, Interim OR Manager, also from St. Joseph East, who describes how a Total Joint Arthroscopy tool was designed, tweaked, and ultimately utilized to engage perioperative staff when assessing adherence to evidence-based practices. The one-page tool was designed to reliably evaluate practices and identify gaps or opportunities for improvement. **CLICK TO LISTEN**

HRET HIIN is pleased to release two of three newly recorded Surgical Site Infection Prevention Podcasts. These podcasts have been produced to highlight the important role that patients and family engagement have in reducing SSI harms. They focus on providing easily accessible and practical tips for how to promote practices designed to prevent surgical site infections. Keep an eye out for the third recording, to be released this month.

AUDIENCE
These podcasts are ideal for Perioperative practitioners, Infection Preventionists, Quality Leaders and others interested in engaging patients and families in efforts to prevent surgical site infections in our patients.

AVAILABLE via Soundcloud and the HRET HIIN website
