

THE UP CAMPAIGN: PERFORMANCE MONITORING TOOL

Instructions

- > When implementing the UP Campaign, it is helpful to monitor your performance on a weekly basis. This tool helps to do so.
- > Randomly select five applicable patients that have been in the hospital for more than 24 hours. If you start on a pilot unit, select patients only on that unit but rapidly spread house-wide. Review each record for the past day and answer each question with "yes," "no" or "N/A".
- > Use real-time hand hygiene observations for SOAP UP.

PATIENT NAME	SOAP UP Hand hygiene performed per policy	WAKE UP Least possible amount of sedation used to obtain goal POSS or RASS	GET UP Patient mobilized to highest level of mobility per protocol	SCRIPT UP Medication list evaluated for necessary changes.	COMMENTS
# YES	/5	/5	/5		

ACTIONS: WHAT WILL YOU DO DIFFERENTLY NEXT WEEK IF ALL ANSWERS WERE NOT YES?

Review HRET change packages and other resources for specific ideas to support reducing patient harm: www.hret-hiin.org.

Acknowledgements

We would like to recognize the contributions of Cynosure Health and the Health Research Educational Trust Hospital Improvement Innovation Network team for their work in developing the content of the UP Campaign.
