WAKE UP

Help patients be alert and active

- Talk to patients and their family to establish clear expectations (zero pain is unlikely)
- Employ pain management techniques that allow for patient mobility
- Manage pain with non-pharmacologic therapy options
- Use a simplified, standard scale to safely optimize pain control (e.g. POSS)

THINK UP

The HRET HIIN UP Campaign is designed to simplify safe care, streamlining interventions to improve care across several topic areas. Ask your manager for more information about the campaign and to find out more visit www.hret-hiin.org
